

AHMED ABBAS AHMED

Frontend Developer | React.js & Next.js

Mansoura, Dakahlia, Egypt | +20 1069160736 | ahmedabs777@gmail.com | [Github](#) | [LinkedIn](#)

SUMMARY

Frontend Developer specializing in React.js and Next.js, with hands-on experience building responsive, production-ready web applications for freelance clients. Proficient in TypeScript, REST API integration, form validation with Zod and React Hook Form, and modern data-fetching patterns with TanStack Query. Focused on writing clean, maintainable, accessible code and delivering pixel-accurate UI from design to deployment.

TECHNICAL SKILLS

Languages & Core: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frameworks & Libraries: React.js, Next.js, React Hook Form, Zod, TanStack Query, Shadcn/UI, Tailwind CSS

Tools & Practices: Git, GitHub, REST APIs, Fetch API, npm, Vercel, Responsive Web Design

EXPERIENCE

Freelance Frontend Developer — Self-employed

2024 – Present

- Built and shipped responsive web applications for freelance clients using React.js and Next.js, from requirements gathering through deployment on Vercel.
- Integrated REST APIs and managed asynchronous data flows with TanStack Query, reducing redundant network requests through caching.
- Implemented form validation and type-safe data handling using React Hook Form and Zod, cutting client-side input errors.
- Translated client UI requirements into pixel-accurate, mobile-first interfaces using Tailwind CSS and Shadcn/UI.
- Collaborated directly with clients across the project lifecycle to scope features, gather feedback, and iterate on deliverables.

Zikola — Frontend Developer Intern

On-site Internship | 2 Months

- Developed responsive and user-friendly web interfaces using modern frontend technologies.
- Worked with HTML, CSS, JavaScript, React.js, Next.js and modern frontend development practices.
- Translated UI designs into responsive and reusable web components.
- Collaborated in a professional development environment and gained practical experience working on real-world tasks.
- Received a [certificate of completion](#).

PROJECTS

VU Platform - AI-Powered Virtual Interview Platform — [Live Demo](#) [Github](#)

- Led a core part of the Frontend implementation within a full cross-functional team (UI/UX, Frontend, Backend) to build an AI-powered technical interview platform featuring real-time eye/body tracking, automated candidate scoring, and instant evaluation reports.
- Built and owned responsive, type-safe UI components using Next.js and Tailwind CSS, covering company-facing (job posting, candidate review, bulk filtering) and candidate-facing (job browsing, AI interviews, application tracking) flows.
- Implemented form validation, API integration, and state management using Zod and React, ensuring reliable data flow between candidates, companies, and the AI evaluation engine.
- Coordinated with UI/UX and Backend teams to align component structure with design specs and API contracts.

React Web Application — [Live Demo](#) [Github](#)

- Full-featured React application demonstrating component architecture, routing, and state management.

Company Portfolio Site — [Live Demo](#) [Github](#)

- Responsive company portfolio built with React/Next.js and deployed on Vercel.

EDUCATION

Bachelor of Computer and Information Sciences

Mansoura University — Class of 2026
